Homework 2

Michael Clausen, <insert name>

1.
$$\alpha$$
) yes b) nor c) nor

2. α] $\exists x \exists y \left(P(x) \land P(y) \right)$
b) $\forall x P(x)$
c) $7 \exists x P(x)$
d) $\neg \forall x P(x)$
e) $\exists x \left(\neg P(x) \right)$
f) $\forall x P(x) \rightarrow S(x)$
g) $\exists x \exists y \left(P(x) \land P(y) \land S(x) \land S(y) \right)$
h) $\neg \exists x \left(P(x) \land S(x) \right)$
i) $\exists x \exists y \left(P(x) \land P(y) \land \neg S(x) \land \neg S(y) \right)$

```
4. a) Rule:
(defrule parents
       (parent ?x ?y)
=>
       (printout t ?y crlf)
)
Output:
Sanjay
Sonia
Sonia
Rajeev
Rajeev
Indira
Indira
b) Rules:
(defrule cousins
       (sibling ?p1 ?p2)
       (parent ?cousin1 ?p1)
       (parent ?cousin2 ?p2)
=>
       (assert (cousin ?cousin1 ?cousin2))
```

```
)
(defrule print
       (cousin ?cousin1 ?cousin2)
=>
       (printout t ?cousin1 " and " ?cousin2 " are cousins " crlf)
)
Output:
Varun and Priyanka are cousins
Varun and Rahul are cousins
5. a) Rule:
aunt(X, Y):- parent(Z, X), parent(Z, W), parent(W, Y), female(X).
Output:
Query: aunt(X, Y).
X = liz,
Y = ann
X = liz,
Y = pat
X = ann,
Y = jim
X = pat,
Y = jim
False
```

b) Rules:

```
maternal\_ancestor(X, Z):- parent(X, Z), female(X). maternal\_ancestor(X, Z):- parent(X, Y), maternal\_ancestor(Y, Z).
```

Output:

Query: $maternal_ancestor(X, Z)$.

X = pam,

Z = bob

X = pat,

Z = jim

X = pam,

Z = jim

X = tom,

Z = jim

X = bob,

Z = jim

False

6. a) Tizi - Student has taken CPSC131 1338 - Student has taken Math 338 T335 - Student has taken CPSC335 T375 - Student has taken CPSC 3 73. Tys - Student has taken CPSC481. Tygz-Student has taken CPSC483. Cz75 - Student can take CPSC375. Cyg - Sindert can take CPSC481. Cy83 - Student can take CPSC 483. C131 - Student can take CPSC 131. C338 - Student can take Marh 338. C335 - Student con take CPSC 335.

b) 1. $(T_{131} \wedge T_{338}) \longrightarrow C_{375}$ 2. $\left(T_{335} \wedge T_{338}\right)$ $\rightarrow C_{481}$ 3. $\left(T_{375}\right)$ $\rightarrow C_{483}$ 4.
